Equipment Screens

To hide equipment or HVAC systems on a roof, an Equipment Screen can be installed. There are many options in material and installation methods. Consult with Metal Building Parts & Sales to formulate an Equipment Screen design to work best on your roof.

The pictures above show a designed equipment screen plan as follows:

1. Structural steel subs put in tube columns every 10' and welded on clips
2. Roofer sealed the columns
3. Metal Building Parts & Sales installed 6" galvanized girts, hat channel, MLoc horizontal panels, and J trim
