

Metal Canopies

Customize your Building with Unique Metal Canopies and Entryways

Metal Canopies can be attached directly to buildings to provide added shelter from the elements.

Consider updating your building with a customized metal canopy whether for sun protection, rain, a covered patio, service window, a more attractive entrance or business advertising.

Metal Building Parts & Sales will supply the material only or a package with parts and labor to add a canopy to your building. For any update or repair to a metal building, email us your contact information and a detailed description and receive an estimate on the project.
